PAXIA

Airline Catering Management Solutions

For 20 years, global airlines of all sizes have counted on Paxia's cloud-based catering operations products and expert services team to reduce catering overspend, reduce wastage, save on fuel, and manage and simplify delivering onboard services.

How We Measure Success

3,251
Fleet managed

1,674
Destinations served daily

1.22M
Flights managed annually

183K
Product specifications managed

1.49M
Passengers served daily

525M
Passengers served annually

1B
Meal/Beverage Services catered annually

"*Paxia's cloud-based catering system now automates more than **60 percent** of our catering activities, including inflight meals, beverage services and amenities such as pillows and blankets.*"

"We were able to **optimize resources** across our catering services network with Paxia, saving time and money."

Airline Benefits

Simplified planning

Reduced wastage

Saved fuel

"*Due to the great partnership with Supplair and their extensive knowledge of the airline industry we were able to develop a tailor made quality product which reduces wastage in onboard ready-meals by up to **35%**.*"

"We had a significant **reduction in our supply chain management costs** with the main savings resulting from optimized warehousing space, increased accuracy in matching quantities purchased with those consumed, and a reduction in cargo space usage and fuel consumption."

Results in

100%
Customer Retention

"*Paxia allowed us to assign onboard menus and meals **tailored** for each of our routes.*"

Business Operations Benefits

With Paxia Solutions, airlines can:

- Reduce IT complexity
- Gain more flexibility to support dynamic business changes
- Improve efficiencies and standardize catering management practices and controls
- Create operational and business alignment across both functions
- Significantly lower costs from consolidating applications
